

A true classic the **Sheffield CycleRax** is used and appreciated universally.

Technical Specification

Height:	800mm	
Width:	700mm	
Weight:	Steel: 10.0 kilo	Stainless Steel: 6.0 kilo
Diameter:	Steel: 48 x 3mm	Stainless Steel: 50 x 2mm
Fixing styles:	Submerged or Bolt down flange	

Models Available	Product Code	
	Submerged	Bolt down flange
Galvanized	CSHE-01	CSHE-06
Galvanized & polyester powder coated	CSHE-02	CSHE-07
Rilsan black nylon powder coated	CSHE-03	CSHE-08
Stainless Steel	CSHE-04	CSHE-09
Armoured Sheen	CSHE-05	CSHE-10

GALVANIZED STEEL

Recognised for being long lasting and corrosion resistant.

All galvanizing is certified to BS EN ISO 1461 and carried out after final manufacture ensuring a consistently high product quality.

GALVANIZED & POLYESTER POWDER COATED

The products are sweep blasted after galvanizing prior to coating to ensure good adhesion of the powder to the galvanized surface minimising the risk of chipping.

A wide range of RAL colours are available.

RILSAN BLACK NYLON POWDER COATED

The ultimate long lasting thermoplastic coating for steel which is extremely hard wearing, scratch and chip resistant, warm to the touch and kind to cycle frames.

Rilsan is made from a renewable plant source and provides the perfect solution to corrosion without costing the earth.

STAINLESS STEEL

Manufactured from premium grade 304L, ensuring a long dependable service life, hand polished to a fine brushed finish. Also available in 316 grade.

ARMOURED SHEEN

An exciting new development for street furniture offering not only a much tougher finish than conventional stainless steel but also enjoying an amazing, long lasting, and maintenance free surface.

The stainless steel cycle stands are shot blasted to give a work hardened, scratch resistant surface, and then electro-polished, leaving a highly corrosion resistant surface with a beautiful bright sheen finish.
